Description

The Ultra has long been recognised as the best, most modern and longest lasting portable toilet on the Australian market today. We build our products tough from the ground up, starting with the galvanised steel skid, twin sheeted walls and large waste and water tank storage units. The sturdy galvanised lifting lugs form part of the structural assembly and are connected to internal steel rods linked to the unit's skid base.

The Ultra is a fresh water flush unit allowing all users to wash their hands, providing a safer, healthier environment for workers and event goers. It also features an easy clean, ergonomic, attractive appearance that looks great on any job.

Internal Features

- The first one-piece bowl and seat surround in polyethylene for high durability with stainless steel flap
- Hygienic flush with new spiral water channel increasing velocity and coverage of the flushing action
- Easy to clean
- Heavy duty marine grade pump to operate fresh water flush system
- Self draining hand basin with separate soap holder and wash tap
- Hinged lock down Bowl Assembly to assist with cleaning and emptying of waste tank
- Non slip floor designed to self drain, reducing both the cleaning and maintenance demands

Options

- Sewer Connection
- Foot Pump Operation
- Rear Evacuation Point
- Soap/Sanitiser Dispenser
- Trailer Mounted
- LED Solar Sensor Light
